INTRODUCING

THE NEW

Gladiolus

General

Pershing

Arthur A. Kirchhoff, Gladiolus

Description

This new gladiolus has large flowers, even larger than the blossoms of the well known Mrs. Francis King. The flowers are borne on a tall and erect spike, with 3 to 4 open at one time. There are anywhere from 15 to 24 buds on a spike. This variety stands the heat of the sun, and is also a good one to stand transportation. The upper parts are pale pink, lower petals are yellow, striped and stippled with rich carmine.

General Pershing is indeed a grand variety. It has found many admirers since we started showing it to the public. Wherever it has been shown it has attracted much attention and received many favorable comments.

The stock of this variety is limited, and we are therefore offering it in small quantities to those who wish to acquire bulbs of a variety that will be much in demand within the next few years.

This special variety was originally
on our grounds

Bulbs of a good blooming size at 30c

Gladiolus Grower Pembroke, N. Y.
